

# METAL PROGRESS

Volume 50; July 1946 to December 1946

## Table of Contents for Vol. 50

\$250,000 for Traveling Fellowships, by William Griffiths (c) .....	481	Applications of Bessemer Bars Requiring Quality, by J. D. Armour .....	904	Corrodibility of Some Common Metals and Alloys, by Jerome Strauss and E. E. Thum (d) .....	884-B
Acid Openhearth Slag Fluidity and Its Significance, by G. R. Fitterer, J. W. Linhart, B. B. Rosenbaum, J. B. Kopec, S. Poch and W. G. Wilson (a) .....	824	A Practical Furnace for Vacuum Melting, by A. U. Seybolt .....	1102	Corrosion Engineers Organize (cp) .....	292
A Diagnosis, by William B. Brooks (c) .....	484	A Run-Down Research Laboratory (cp) .....	82	Corrosion Tests on Magnesium, by F. A. Fox and C. J. Bushrod (a) .....	1270
A Fable for Atom Busters, by Dorothy K. Spencer (c) .....	673	Automatic Heat Treating Machine, by John R. Morrison .....	952	Crack Sensitivity of Chromium-Nickel Stainless Weld Metal, by R. David Thomas, Jr. ....	474
Aircraft Engines, by E. Wood (a) .....	1252	Automatic Horseshoe Manufacture, by Herman Stieglitz (bp) .....	302	Creep Resistant Alloy Steels, by S. E. Wolfson and M. P. Myahkov (a) .....	342
A.I.S.I. Standard Alloy Steel Compositions (d) .....	821	A View of the Future of Metals, by Ernest E. Thum .....	844	Crystallography of the Chemical Elements, by William Hume-Rothery; Modified by H. C. Vacher (d) ....	847, 8, 9
All-Aluminum Gas Engines (cp) .....	81	Basic Electric Furnace, by H. C. Biggs (c) .....	311	Cutting Fluids (a) .....	722
Alloy Steels Intermediate in Chromium, by Claude L. Clark .....	1198	Bearing Development up to Date, by Henry W. Luetkemeyer (a) .....	918	Damping Capacity and the Fatigue of Metals, by R. F. Hanstock and A. Murray (a) .....	1108
Alphabetical Nuclear Physics, or, History Repeats Itself, by B. Fullman (c) .....	1208	"Behind the Sample" Evaluation (cp) .....	82	Development in Aircraft Engine Metallurgy, 1920-1946, by Walter E. Jominy .....	687
Aluminum Casting Alloy, by H. S. Jerabek (d) .....	874	Bonus Pay for Fine-Grained Castings (cp) .....	292	Distinguishing the Common Aluminum Alloys, by Frank C. Bennett, Jr. (bp) .....	659
Aluminum for Automobiles, by E. G. West (a) .....	1262	Boron in Steel, by Robert S. Archer ..	677	Doggonit; a Ghost, by J. A. Finley (c) ..	673
Aluminum for Body Armor (cp) .....	82	"Brittle" Fracture of Ductile Metal, by Jacob B. Friedman .....	1208	Dolomite Linings for Basic Electric Arc Furnaces, by E. C. Brampton, H. Parnham and J. White (a) .....	146
A Method for Evaluating the Toughness of Steel, by S. A. Herres and A. F. Jones .....	462	Calculation of Jominy End-Quench Hardenability Curves, by Charles K. Donoho (d) .....	484-B	Edge Rounding Avoided With Cast Iron Grit, by Anton L. Schaeffer (bp) ..	659
A Modern Research Laboratory (cp) ..	81	Ceramics for Work at High Temperature (cp) .....	293	Effect of Changes in Carbides on the Properties of Steel, by J. B. Austin ..	1191
An Improvised Hardness Test, by Theodore F. Burch (bp) .....	661	Cold Treatment of Die Steel, by W. J. Jabsen and Phillip J. Krebs (bp) ..	299	Effect of Residual Stress on Fatigue, by G. Forrest (a) .....	1254
An Introduction to Alphabetical Nuclear Physics, by Marmaduke Gwynne (c) .....	310	Comparison of Surfaces, by Edward B. Hughes (bp) .....	299	Effect of Water Vapor on Magnesium Alloys During Heat Treatment, by R. F. Thomson, D. B. Burks and W. E. Jominy .....	67
Anodic and Organic Finishes (a) .....	716	Conference on Machinability (a) .....	722		
Antiquity of Lost-Wax Process, by Metallurgicus (c) .....	481	Control of Quality in Steel Manufacture, by A. O. Schaefer .....	815		
Antiquity of Lost-Wax Process, or, Who Is Metallurgicus, Where Is He? by F. C. Trewe (c) .....	1211	Conversion Tables for Lengths, by Carl Hering (d) .....	802		
		Copper Plate as a Stop-Off When Nitriding, by E. R. Fahy (c) .....	673		

(a) Abstract; (bp) Bits and Pieces; (c) Correspondence; (cp) Critical Points; (d) Data Sheet.

Electrolytic Manganese, by R. T. C. Rasmussen (a) .....	1250	Nondestructive Analysis of a Metallurgical Unknown, by Sam Tour (c) ..	314	Standard Hardenability Test (d) .....	1004
Electrolytic Polishing of Metal Samples, by A. E. Pellissier, Jr., Harold Markus and Robert F. Mehl (d) ....	1084	Nuclear Power .....	1204	Standard Stainless Steels; Wrought and Cast (d) .....	824
Electroplating in Postwar Finishing, by Charles L. Faust .....	1068	Phantom Halfback, by John F. Kahles (c) .....	1206	Standard Tolerances for Forgings up to 100 Lb. (d) .....	1029
End-Quench Hardenability Versus Hardness of Quenched Rounds, by George K. Manning .....	647	Pick-Up for Tiny Parts, by A. M. Fiala (bp) .....	88	Statistical Control Applied to Wrench Manufacture, by F. J. Robbins .....	287
Engineering Properties of "A" and "L" Nickel (d) .....	836-B	Plasticity in Experiment and Theory, by Michael C. Corson (c) .....	1209	Statistical Quality Control at Lockheed, by James R. Crawford and Preston C. Hammer (a) .....	156
Engineering Properties of Monel (d) ..	890	Plating on Plastics, by Harold Narcus	1067	Steelmaking Practice as It Affects Properties of Interest to the User, by Charles H. Herty, Jr. ....	809
Exposure Chart for Bausch and Lomb Research Metallograph, by Anton L. Schaeffer (d) .....	1118	Platinum Refining and Melting, by C. C. Downie (c) .....	483	Straightening of Warped Shafts, by Theodore F. Burch (bp) .....	91
Evaluation for Thermal Stability (cp) ..	293	Polishing and Buffing, by Henry L. Kellner .....	1070	Substitute Metallurgical Products, by Albert M. Portevin .....	485
Fatigue Strength of Fillet, Plug and Slot Welds in Ordinary Bridge Steel (a) .....	142	Postwar Metal Cleaning Methods, by Lionel De Waltoff .....	1064	Subsurface Nucleus of Failure, by R. D. Zonge (c) .....	674
Foaming of Bearing Metal During Casting, by E. A. Wolfenden .....	479	Postwar Metal Finishing, by Adolph Bregman .....	1061	Superalloys for High Temperature Service in Gas Turbines and Jet Engines, by F. S. Badger, H. C. Cross, C. T. Evans, Jr., Russell Franks, R. B. Johnson, N. L. Mochel and Gunther Mohling .....	97
Forging Alloy Steel Radial Engine Crankcases, by A. J. Pepin and A. L. Rustay .....	1023	Postwar Organic Finishes, by Gustave Klinkenstein .....	1076	Technical Aspects of Atomic Control ..	646
Fractographic Structures in Bismuth, by Carl A. Zapffe .....	283	Postwar Paints and Painting Methods, by E. A. Zahn .....	1075	Temperature Conversions (d) .....	843
Gas Carburizing, by Ivor Jenkins (a) ..	960	Precautions in Handling Cyanide, by E. F. Houghton & Co.'s Staff (d) ..	1010	Tempering Springs (as It Was Done), by J. K. McHugh (bp) .....	300
Graphite Molds for Casting Jominy Bars, by P. M. Sanders (bp) .....	91	Precise Measurements and Inspection by Stereoscopic Radiography, by B. J. DeSimone .....	71	The Art of Quenching; I—Coolants, by Roy G. Roshong .....	948
Hardenability and Quench Cracking, by L. D. Jaffe and J. H. Hollomon (a) ..	964	Preliminary Report on Bikini .....	300	The Bailey Bridge, by S. A. Stewart (c) ..	674
Hardenability of Common Toolsteels, by Stewart M. DePoy (d) .....	1052	Preliminary Report on Second Bikini Test .....	482	The Effect of Metallurgical Changes Due to Heat Treatment Upon the Fatigue Strength of Carbon Steel Plates, by Walter H. Bruckner and William H. Munse (a) .....	704
Hardenability of N.E. 8600H Steels, by A. L. Boegehold (d) .....	1220-B	Principles of Metal Cleaning, by Jay C. Harris .....	1063	The Influence of Melting Conditions on the Physical Properties of Steel Castings, by H. T. Protheroe (a) .....	120
"H" Steels; Chemical Composition Ranges (d) .....	830	Processes for Making Barium and Its Alloys, by W. J. Kroll (a) .....	138	The Martensite Transformation, by A. R. Troiano and A. B. Greninger .....	302
Hydrogen in Metals, by Albert Portevin (c) .....	1206	Production of Electrolytic Iron Powder, by Harold V. Trask .....	279	The Mechanism of Tool Vibration in the Cutting of Steel, by R. N. Arnold (a) .....	709
Improvement in Design of Immersion Pyrometers for Liquid Steel Temperatures, by D. Manterfield and J. R. Thurston (a) .....	504	Raised (?) Yield Point in Bend Tests, by T. J. Dolan and O. Sidebottom ..	653	The Mystery of the Metal Congress, by Cy Anide .....	1196
Improvements in the Manufacture of Tin Bronzes, by W. T. Pell-Walpole ..	1221	Random Notes on Chinese Steel Industry, by J. K. Stafford .....	470	The Nitriding of Steel, by Carl F. Floe ..	1212
Induction Hardening of Armor, by T. Bishop .....	954	Recent Publications on the Testing of Metallic Finishes, by Myron B. Diggin and Otto Kardos .....	1072	The Origin and Constitution of Certain Nonmetallic Inclusions in Steel, by J. R. Rait and H. W. Pinder (a) .....	710
Inhibitors of Corrosion of Aluminum, by G. G. Eldredge and R. B. Mears (a) .....	520	Reclamation of Aircraft Aluminum, by G. W. Birdsall .....	1232	The Relation of Stress to Strain in Magnesium-Base Alloys, by E. J. Eastman, J. C. McDonald and A. A. Moore (a) .....	608
Iron-Carbon Equilibrium Diagram (d) .....	96-B, 970	Records of Stainless in Atmospheric Exposure (cp) .....	292	The Resistance of Metals to Scaling, by Benjamin Lustman .....	850
Killed Bessemer Steel for Seamless Tubes, by E. C. Wright .....	662	Report of Conference on Machinability (a) .....	506	The Russian Plan for Atomic Control ..	83
Liquid Carburizing, by R. S. Komarnitsky .....	665	Report to National Advisory Committee for Aeronautics (Contract NAW-1227), by W. F. Hess and E. F. Nippes, Jr. (a) .....	328	The Structure of Tempered Martensite, by W. J. Wrazej (a) .....	966
Loosening Hot Tensile Specimens, by Harold Smallen (bp) .....	302	Report to the Combined Intelligence Objectives Subcommittee on I. G. Farbenindustrie, by T. P. Colclough (a) ..	332	The Use of Leaded Gun-Metal for the Production of Castings to Withstand Pressure, by Frank Hudson (a) .....	522
Machinability Versus Physical Properties—an Example, by M. Eugene Merchant .....	1013	Room Temperature Casting Resin for Metallographic Mounts, by George L. Kehl and J. S. Church .....	1089	The Work of the Admiralty Ship Welding Committee, by A. L. Clark and G. M. Boyd (a) .....	514
Magnesium Alloys, by H. S. Jerabek (d) .....	308-B	Russian Metallurgical Literature, by V. N. Krivobok (c) .....	484	Timing High Speed Tools in High Heat, by A. A. Bradd (c) .....	676
Maximum Carbon in Gas Carburizing, by Gerard H. Boss .....	657	Salt Bath for Heat Treating 18-8, by Keith Whitcomb .....	294	To Remove Passive Film When Etching, by Gerrit de Vries (bp) .....	90
Mechanized Mold Preparation, by A. W. Thornton (bp) .....	89	Salt Baths for 18-8, by L. F. Train (c) ..	676	Transfer of Stress Grid to Metal, by N. C. Ferguson (bp) .....	309
Metal Stampings (a) .....	132	Salt Baths for Hardening High Speed, by W. E. Bancroft .....	941	Transformation of X-4130 Steel During Continuous Cooling, by C. A. Liedholm, S. S. Lopez and W. C. Coons (d) ..	998
Metallographic Etchant to Distinguish Oxidation in Steel, by A. M. Hall ..	92	Sampling a Lot, and Life Tests, by A. P. Bellinghausen (c) .....	1205	Underwater Cutting and Welding, by Charles Kandel (a) .....	1033
Metallurgical Development of Materials for Turbosuperchargers and Aircraft Gas Turbines, by W. L. Badger (a) ..	510	Scientists as Prophets Before Hiroshima .....	301	Use of Coated Lenses for Metallography, by Edward Walden .....	1097
Microradiography With Routine X-Ray Equipment, by Edward I. Salkovitz .....	1091	Scratches on Spring Wire, by Alberto Oreflice (c) .....	309	Use of Stainless Steel as a Structural Material in Jet-Propelled Aircraft, by Given Brewer .....	84
Mining and Concentration of Missouri Valley Manganese at Chamberlain, So. Dak., by Leon W. Dupuy, W. A. Calhoun and R. T. C. Rasmussen (a) ..	320	Screw-Driven Creep-Rupture Testing Machine, by M. J. Manjoine .....	1100	Utilizing Fatigue Tests in Designs (cp) ..	291
Mr. Molotov Discusses Bombs .....	956	S-Curve for S.A.E. 4140 Steel, by Research Laboratory, U. S. Steel Corp. (d) .....	990	Variability in Tests on Bearings (cp) ..	291
Molybdenite as a Die Lubricant, by T. E. Norman (c) .....	314	Selection of Die Castings, by David Basch and S. E. Maxon (d) .....	930	Variation in Properties With Size of 14S-T Billets, by H. C. Ihlen (c) .....	1218
Morphology and Kinetics of the Constituents in Quenched Steels, by Albert M. Portevin (c) .....	311	Shepherd Grain Size Fracture Standards, by George K. Manning (d) .....	1046	Variations in Properties With Size of 14 S-T Billets, by L. W. Davis (c) ..	308
Mounting Fine Wire for Cross-Sectional Examination, by R. L. Duffner and E. S. Norris (bp) .....	658	Shot-Peening of Springs, by Alberto Oreflice (c) .....	676	Views on Atomic Control .....	483
National Emergency Alloy Steels (d) ..	832	Shot-Peening of Springs, by Fred K. Landecker (c) .....	1210	Warlike Developments in Steel Castings, by G. Vannerholm .....	75
Naval Engineering Duty in Wartime, by Richard Doughton, Jr. ....	455	Silver Bearings, by E. B. Etchells and A. F. Underwood (a) .....	524	Warlike Electroplating, by George B. Hogaboom .....	1065
New Method for Melting Magnesium, by C. H. Lorig .....	1020	Skulls Prevented by Boron Nitride, by E. Epremlan .....	661	Weldable High Strength Steel Castings, by Welton J. Crook .....	906
New Studies on Alloys for Gas Turbines (cp) .....	293	Special Alloys for Gun Synchronizer, by Herbert C. Roters (bp) .....	89	Wrought Aluminum Alloys, by H. S. Jerabek (d) .....	864
Nomogram for Estimating Temperature Range of Martensite Formation, by Charles K. Donoho (d) .....	676-B	Standard Carbon and Free Cutting Steels (d) .....	820	Wrought Copper Alloys With High Silicon, by A. G. H. Andersen .....	820

(a) Abstract; (bp) Bits and Pieces; (c) Correspondence; (cp) Critical Points; (d) Data Sheet.

# List of Authors

Andersen, A. G. H.—Wrought Copper Alloys With High Silicon	839	Andersen, A. G. H.—Wrought Copper Alloys With High Silicon	839	De Wattoff, Lionel—Postwar Metal Cleaning Methods	1064
Anide, Cy.—The Mystery of the Metal Congress	1196	Aluminum for Body Armor	82	Diggin, Myron B. and Otto Kardos—Recent Publications on the Testing of Metallic Finishes	1072
Archer, Robert S.—Boron in Steel	677	A Modern Research Laboratory	81	Dolan, T. J. and O. Sidebottom—Raised (?) Yield Point in Bend Tests	653
Armour, J. D.—Applications of Bessemer Bars Requiring Quality	904	A Run-Down Research Laboratory	82	Donoho, Charles K.—Calculation of Jominy End-Quench Hardenability Curves (d)	484-B
Arnold, R. N.—The Mechanism of Tool Vibration in the Cutting of Steel (a)	700	"Behind the Sample" Evaluations	82	Nomogram for Estimating Temperature Range of Martensite Formation (d)	676-B
Austin, J. B.—Effect of Changes in Carbides on the Properties of Steel	1191	Bonus Pay for Fine Grained Castings	292	Doughton, Richard, Jr.—Naval Engineering Duty in Wartime	455
Badger, F. S., H. C. Cross, C. T. Evans, Jr., Russell Franks, R. B. Johnson, N. L. Mochel and Gunther Mohling—Superalloys for High Temperature Service in Gas Turbines and Jet Engines	97	Ceramics for Work at High Temperature	293	Downie, C. C.—Platinum Refining and Melting (c)	483
Badger, W. L.—Metallurgical Development of Materials for Turbosuperchargers and Aircraft Gas Turbines (a)	510	Corrosion Engineers Organize	292	Duffner, R. L. and E. S. Norris—Mounting Fine Wire for Cross-Sectional Examination (bp)	658
Bancroft, W. E.—Salt Baths for Hardening Speed	941	Evaluation for Thermal Stability	293	Dupuy, Leon W., W. A. Calhoun and R. T. C. Rasmussen—Mining and Concentration of Missouri Valley Manganese at Chamberlain, So. Dakota (a)	320
Basch, David and S. E. Maxon—Selection of Die Castings (d)	930	New Studies on Alloys for Gas Turbines	293	Eastman, E. J., J. C. McDonald and A. A. Moore—The Relation of Stress to Strain in Magnesium-Base Alloys (a)	698
Bellinghausen, A. P.—Sampling a Lot, and Life Tests (c)	1205	Records of Stainless in Atmospheric Exposure	292	Eldredge, G. G. and R. B. Mears—Inhibitors of Corrosion of Aluminum (a)	520
Bennett, Frank C., Jr.—Distinguishing the Common Aluminum Alloys (bp)	659	Utilizing Fatigue Tests in Designs	291	Epreman, E.—Skulls Prevented by Boron Nitride (bp)	661
Bigger, H. C.—Basic Electric Furnace (c)	311	Variability in Tests on Bearings	291	Etchells, E. B. and A. F. Underwood—Silver Bearings (a)	524
Birdsall, G. W.—Reclamation of Aircraft Aluminum	1232	Crook, Welton J.—Weldable High Strength Steel Castings	906	Evans, C. T., Jr., Russell Franks, R. B. Johnson, N. L. Mochel, Gunther Mohling, F. S. Badger and H. C. Cross—Superalloys for High Temperature Service in Gas Turbines and Jet Engines	97
Bishop, T.—Induction Hardening of Armor	954	Cross, H. C., C. T. Evans, Jr., Russell Franks, R. B. Johnson, N. L. Mochel, Gunther Mohling and F. S. Badger—Superalloys for High Temperature Service in Gas Turbines and Jet Engines	97	Fahy, E. R.—Copper Plate as a Stop-Off When Nitriding (c)	673
Boegehold, A. L.—Hardenability of N.E. 8600H Steels (d)	1220-B	Data Sheets		Faust, Charles L.—Electroplating in Postwar Finishing	1068
Boss, Gerard H.—Maximum Carbon in Gas Carburizing	657	A.I.S.I. Standard Alloy Steel Compositions	821	Ferguson, N. C.—Transfer of Stress Grid to Metal (bp)	300
Boyd, G. M. and A. L. Clark—The Work of the Admiralty Ship Welding Committee (a)	514	Aluminum Casting Alloy, by H. S. Jerabek	874	Fiala, A. M.—Pick-Up for Tiny Parts (bp)	88
Bradd, A. A.—Timing High Speed Tools in High Heat (c)	676	Calculation of Jominy End-Quench Hardenability Curves, by Charles K. Donoho	484-B	Finley, John A.—Doggonit; a Ghost (c)	673
Brampton, E. C., H. Parnham and J. White—Dolomite Linings for Basic Electric Arc Furnaces (a)	146	Conversion Tables for Lengths, by Carl Hering	802	Fitterer, G. R., J. W. Linhart, B. B. Rosenbaum, J. B. Kopec, S. Poch and W. G. Wilson—Acid Openhearth Fluidity and Its Significance (a)	824
Bregman, Adolph—Postwar Metal Finishing	1061	Corrodibility of Some Common Metals and Alloys, by Jerome Strauss and E. E. Thum	884-B	Floe, Carl F.—The Nitriding of Steel	1212
Brewer, Given—Use of Stainless Steel as a Structural Material in Jet-Propelled Aircraft	84	Crystallography of the Chemical Elements, by William Hume-Rothery; Modified by H. C. Vacher	847, 8, 9	Forrest, G.—Effect of Residual Stress on Fatigue (a)	1254
Brooks, William B.—A Diagnosis (c)	484	Electrolytic Polishing of Metal Samples, by A. E. Pellissier, Jr., Harold Markus and Robert F. Mehl	1081	Fox, F. A. and C. J. Bushrod—Corrosion Tests on Magnesium (a)	1270
Bruckner, Walter H. and William H. Munse—The Effect of Metallurgical Changes Due to Heat Treatment Upon the Fatigue Strength of Carbon Steel Plates (a)	704	Engineering Properties of "A" and "L" Nickel	836-B	Franks, Russell, R. B. Johnson, N. L. Mochel, Gunther Mohling, F. S. Badger, H. C. Cross and C. T. Evans, Jr.—Superalloys for High Temperature Service in Gas Turbines and Jet Engines	97
Burch, Theodore F.—An Improvised Hardness Test (bp)	661	Engineering Properties of Monel	890	Friedman, Jacob B.—"Brittle" Fracture of Ductile Metal (c)	1208
Burks, D. B., R. F. Thomson and W. E. Jominy—Effect of Water Vapor on Magnesium Alloys During Heat Treatment	67	Exposure Chart for Bausch and Lomb Research Metallograph, by Anton L. Schaeffer	1118	Fullman, B.—Alphabetical Nuclear Physics, or, History Repeats Itself (c)	1208
Bushrod, C. J. and F. A. Fox—Corrosion Tests on Magnesium (a)	1270	Hardenability of Common Toolsteels, by Stewart M. DePoy	1052	Greninger, A. B. and A. R. Trolano—The Martensite Transformation	303
Calhoun, W. A., R. T. C. Rasmussen and Leon W. Dupuy—Mining and Concentration of Missouri Valley Manganese at Chamberlain, So. Dakota (a)	320	Hardenability of N.E. 8600H Steels, by A. L. Boegehold (d)	1220-B	Griffiths, William—\$250,000 for Traveling Fellowships (c)	481
Church, J. S. and George L. Kehl—Room Temperature Casting Resin for Metallographic Mounts	1089	"H" Steels; Chemical Composition Ranges	830	Gwynne, Marmaduke—An Introduction to Alphabetical Nuclear Physics (c)	310
Clark, A. L. and G. M. Boyd—The Work of the Admiralty Ship Welding Committee (a)	514	Iron-Carbon Equilibrium Diagram	96-B, 970	Hall, A. M.—Metallographic Etchant to Distinguish Oxidation in Steel	92
Clark, Claude L.—Alloy Steels Intermediate in Chromium	1198	Magnesium Alloys, by H. S. Jerabek	308-B	Hammer, Preston C. and James R. Crawford—Statistical Quality Control at Lockheed (a)	150
Requirements of Steels for High Temperature Service	897	National Emergency Alloy Steels	832	Hanstock, R. F. and A. Murray—Damping Capacity and the Fatigue of Metals (a)	1108
Colclough, T. P.—Report to the Combined Intelligence Objectives Subcommittee on I. G. Farbenindustrie (a)	332	Nomogram for Estimating Temperature Range of Martensite Formation, by Charles K. Donoho	676-B	Harris, Jay C.—Principles of Metal Cleaning	1063
Coons, W. C., C. A. Liedholm and S. S. Lopez—Transformation of X-4130 Steel During Continuous Cooling (d)	998	Precautions in Handling Cyanide, by E. F. Houghton & Co.'s Staff	1010	Hering, Carl—Conversion Tables for Lengths (d)	802
Corson, Michael C.—Plasticity in Experiment and Theory (c)	1209	S-Curve for S.A.E. 4140 Steel, by Research Laboratory, U. S. Steel Corp.	990	Herrera, S. A. and A. F. Jones—A Method for Evaluating the Toughness of Steel	462
Crawford, James R. and Preston C. Hammer—Statistical Quality Control at Lockheed (a)	150	Selection of Die Castings, by David Basch and S. E. Maxon	930	Herty, Charles H., Jr.—Steelmaking Practice as It Affects Properties of Interest to the User	809

(a) Abstract; (bp) Bits and Pieces; (c) Correspondence; (cp) Critical Points; (d) Data Sheet.

Hess, W. F. and E. F. Nippes, Jr.— Report to National Advisory Committee for Aeronautics (Contract NAW-1227) (a) .....	328	Maxon, S. E. and David Basch—Selection of Die Castings (d) .....	930	Roshong, Roy G.—The Art of Quench- ing; I—Coolants .....	948
Hogaboom, George B.—Wartime Elec- troplating .....	1065	McDonald, J. C., E. J. Eastman and A. A. Moore—The Relation of Stress to Strain in Magnesium-Base Alloys (a) .....	698	Roters, Herbert C.—Special Alloys for Gun Synchronizer (bp) .....	89
Hollomon, J. H. and L. D. Jaffe—Hard- enability and Quench Cracking (a) ..	964	McHugh, J. K.—Tempering Springs (as It Was Done) (bp) .....	300	Rustay, A. L. and A. J. Pepin—Forging Alloy Steel Radial Engine Crankcases Salkovitz, Edward I.—Microradiog- raphy With Routine X-Ray Equip- ment .....	1022 1091
Houghton, E. F. & Co.'s Staff—Precau- tions in Handling Cyanide (d) .....	1010	Mears, R. B. and G. G. Eldredge—In- hibitors of corrosion of Aluminum (a) .....	520	Sanders, P. M.—Graphite Molds for Casting Jominy Bars (bp) .....	91
Hudson, Frank—The Use of Leaded Gun-Metal for the Production of Castings to Withstand Pressure (a) ..	522	Mehl, Robert F., Harold Markus and A. E. Pellissier—Electrolytic Polish- ing of Metal Samples (d) .....	1084	Schaefer, A. O.—Control of Quality in Steel Manufacture .....	815
Hughes, Edward B.—Comparison of Surfaces (bp) .....	299	Merchant, M. Eugene—Machinability Versus Physical Properties—an Ex- ample .....	1013	Schaeffler, Anton L.—Edge Rounding Avoided With Cast Iron Grit (bp) Exposure Chart for Bausch and Lomb Research Metallograph (d) ..	650 1118
Hume-Rothery, William and H. C. Vacher—Crystallography of the Chemical Elements (d) .....	847, 8, 9	Metallurgicus—Antiquity of Lost-Wax Process (c) .....	481	Seybolt, A. U.—A Practical Furnace for Vacuum Melting .....	1102
Ihsen, H. C.—Variation in Properties With Size of 14S-T Billets (c) .....	1210	Mochel, N. L., Gunther Mohling, H. C. Cross, F. S. Badger, C. T. Evans, Jr., Russell Franks and R. B. Johnson— Superalloys for High Temperature Service in Gas Turbines and Jet En- gines .....	97	Sidebottom, O. and T. J. Dolan—Raised (?) Yield Point in Bend Tests .....	653
Jabsen, W. J. and Phillip J. Krebs— Cold Treatment of Die Steel (bp) ...	299	Mohling, Gunther, F. S. Badger, H. C. Cross, C. T. Evans, Jr., Russell Franks, R. B. Johnson and N. L. Mochel—Superalloys for High Tem- perature Service in Gas Turbines and Jet Engines .....	97	Smallen, Harold—Loosening Hot Ten- sile Specimens (bp) .....	302
Jaffe, L. D. and J. H. Hollomon—Hard- enability and Quench Cracking (a) ..	964	Moore, A. A., J. C. McDonald and E. J. Eastman—The Relation of Stress to Strain in Magnesium-Base Alloys (a) ..	698	Spencer, Dorothy K.—A Fable for Atom Busters (c) .....	673
